## Ard fry PSD Codec V1.6.1.0 With Key [TorDigger] Serial Key Keygen

ARR\_0157.txt.Q: Linked List Recursion, Type mismatch I'm trying to read a file and store each line in a linked list, then print the lines one at a time. However, when I try to run the program, I get an error saying that I can't convert an int to a linked list. I've tried changing the data type to LinkedList, but that causes a few more problems. This is my code: public class Main { public static void main(String[] args) throws Exception { LinkedList s = new LinkedList(); LinkedList t = new LinkedList(); FileReader fr = new FileReader("us.txt"); BufferedReader br = new BufferedReader(fr); String line = null; while ((line = br.readLine()) != null) { if (line.length() != 0) { s.add(line); } System.out.println(s); } } } Any idea why this is happening? EDIT: It seems that the error is coming from the last line. It complains about the target type of the assignment s.add(line) A: That's because s is a LinkedList and s.add(line) takes a LinkedList. The latter cannot be assigned to the former. You need to make sure that the whole thing is casted to a LinkedList: if (line.length() != 0) { s.add(new LinkedList 3da54e8ca3
