Q: solving a linear differential equation I'm trying to solve the following differential equation to find $f(z)$ $$\frac{z f'' + (1-z)f' - f}{z^2} = \frac{2 \sin{x}}{z^3} - 1 $$ I'm stuck how to start (I've never solved this before). I know that I can integrate this function $$\frac{z f'' + (1-z)f' - f}{z^2}$$ by methods of parts to get the following integral $$- \int \frac{f' - f}{z}$$ But how do I actually start this? A: $$\frac{z f'' + (1-z)f' - f}{z^2} = \frac{2 \sin{x}}{z^3} - 1 $$ Write the general form of a second order ODE as $$z A(z) f'' + (z A' + 2 A(z))$$

f' + (z A'' + A') f = z f' + a(z)$$ Then set the coefficients to be $$A(z) = \frac{2 \sin{x}}{z^3} - \frac{1}{z^2}$$ $$A'(z) = \frac{z \left(4 \sin{x} \cos{x} z - \sin{x} - \sin{x}\cos{x}\right)}{z^5}$$ $$A''(z) = \frac{z \left(-4 \sin{x}^2 z^2 + 4 \sin{x} \cos{x} z + 3 \cos{x}^2 + 4 \sin{x} \cos{x} z - \sin{x} - \sin{x}\cos{x} \right)}{z^6}$$ So you get, $$\frac{z f'' + (1-z)f' - f}{z^2} = \frac{ 09e8f5149f

Internet Explorer add-on for capturing webpages as images, so you can easily save them on your disk. Key features: captures the entire webpage as image (pixels), allows you to save the image as a PNG, JPEG, or TIFF file, allows you to save the image in different colors, allows you to specify the resolution of the output image, allows you to upload images to the Internet, allows you to set the file size limit and the number of saved images per directory. Control Remote Assets on a Website Build a better online experience by allowing only trustworthy websites to add remote assets to your website and control them via JavaScript. The Policy Playground Plugin from the

Scirra team can be found here. Necessary for... eCommerce websites A short description Get Policy Playground Plugin The Scirra Policy Playground Plugin is a JavaScript based module that contains an API which allow you to easily control remote assets. The Policy Playground Plugin is accessible by logging in with your Scirra account. You will then see a popup in the Scirra dashboard that shows which remote assets are currently loaded on your website. You can remove or change the loading permissions for any remote asset within seconds. How to get it Step 1: Sign in and create an account You can find the steps to sign in by following the link in the top right corner of your screen. You can create an account through the Scirra website. Step 2: Install and activate the extension In the list

of plugins on your Scirra dashboard, find and install Policy Playground Plugin. Once you have installed it, you will see the Policy Playground icon in the plugins list on the right. Now, you will be able to add your Scirra Policy Playground API key and username/password to the Key/User/Password box in your online Dashboard.Adding to the frustrated, and possibly angering, clients, among them Nevada Gov. Brian Sandoval, who is heading the state delegations in Washington, D.C., and at the United Nations, China launched on Thursday another attempt to stop the U.S. Navy from claiming its ATS-6 radar planes over the South China Sea could be used to launch an intercontinental ballistic missile. China's Foreign Ministry started its own media campaign warning the

United States against "deliberately" deploying �

Webshot is a lightweight Internet Explorer add-on developed specifically for helping you capture webpages while navigating on the Internet using the Internet Explorer web browser and save the images to files on the disk. It is compatible with Windows XP, 2003 Server, Vista, and 7 (32- and 64-bit versions). Configuration settings It takes nothing more than a fast and simple installation process in order to install this particular Internet Explorer add-on. A help manual cannot be found in the package, only a 'Readme' plain text file that includes useful details about the extension's

capabilities. In case you no longer need the add-on, you can quickly disable it via Internet Explorer's configuration panel. iWebshot gives you the possibility to simply browse on the Internet and open a preferred webpage. It is able to capture the entire webpage to an image file on your computer. You are allowed to take a screenshot of the entire webpage by using the 'iWebshot' command in Tools menu in Internet Explorer or right-clicking on the target webpage and selecting the 'iWebshot' option. What's more, you are offered the possibility to save the captured photos to PNG, JPEG, or TIFF file format. In addition, you can pick the saving directory and specify the filename. On the downside, iWebshot does not come with advanced features. You are not allowed to capture a

user-defined region of the webage, edit the output image by inserting text, geometrical shapes (e.g. rectangles, ellipses, circles, lines), arrows, user-defined text messages, and text/image watermarks, as well as highlighting certain regions using custom colors, just to name some suggestions. Final ideas To sum things up, iWebshot has to offer a simple software solution and comes bundled with a basic feature package for helping you capture entire webpages to an image file. The poor support for configuration settings makes it ideal especially for less experienced users. iWebshot Screenshot: So, you are looking for an alternative to Adobe Photoshop, then PhotoImpact is the best choice. It has a similar look and feel. So, go through the article to learn more about PhotoImpact and

its important features. Adobe PhotoImpact is a powerful multipurpose image editing software developed by Adobe. With its help, you are able to edit

**System Requirements For IWebshot:**

\*Windows 7 (32/64 bit), Windows 8/8.1 (32/64 bit), or Windows 10 (32/64 bit) \*1 GB of RAM (2 GB recommended for widescreen) \*4 GB of free disk space \*DirectX 10 compatible video card \*HDD: 500 MB of free space (1 GB of free space recommended) \*Mac OSX 10.10 (Yosemite) or later or iOS 8 or later \*2 GB of RAM (3 GB recommended for
