

---

**Melsoft Iq Works ((INSTALL))**

For safety precautions for the PLC system, refer to the user manual of the module being used and the MELSEC iQ-R Module Configuration Manual. ⚠ During the operation of the programmable controller system, various messages are displayed on the display, such as "Lack of refrigerant or oil in the compressor", "Insufficient refrigerant pressure", or "Temperature sensor overheated". These messages indicate a potential hazard to the equipment and users and the need to take action. ⚠ In the event of an environmental hazard in the system, you can disable the programmable controller system.
